SUMMARY

Computer Systems Engineering student with hands-on experience building sports analytics tools and data pipelines. Developed an AI-powered tennis coaching platform and a soccer xG prediction model trained on real World Cup data (StatsBomb).

PROFESSIONAL EXPERIENCE

Mitacs Globalink Research Internship · Research Intern May – Aug 2026
Montreal, Canada

- Applying AI and web scraping techniques to research problems under faculty supervision at a Canadian university.

Piquero Technology and Sports · Software Developer Intern Summer 2025

- Built a Q&A chatbot for a national swimming event (500+ attendees), automating FAQ responses and reducing staff workload.
- Designed a Python algorithm for automated data conversion between Hy-Tek (.hy3) and Excel, eliminating manual data entry and improving accuracy.

RIANSA · Data Analyst Intern Summer 2024

- Created and managed Power BI dashboards to visualize nationwide sales data, enabling faster reporting for the commercial team.
- Identified top-performing products and highest-volume client locations (oil wells), generating insights that directly informed sales strategy.

EDUCATION

B.S. Computer Systems Engineering · Graduation: May 2026
Universidad de las Américas Puebla (UDLAP) · Puebla, México

KEY PROJECTS

Winner Way — AI Tennis Coach Platform

- Full-stack tennis analysis platform (React + Python + Flask) featuring an AI coach that analyzes player biomechanics and strategy from video.
- Implemented OpenCV for court keypoint detection and Dynamic Time Warping (DTW) algorithms for player movement analysis.

xG Prediction Model — Soccer Analytics

- Built and trained a Logistic Regression model (Scikit-learn + Pandas) to predict Expected Goals (xG) using 2022 FIFA World Cup data from StatsBomb.

TECHNICAL SKILLS

Languages: Python, SQL **Data & AI:** Pandas, NumPy, Scikit-learn, OpenCV **Visualization:** Power BI, Matplotlib, Seaborn

Development: React, Flask, Streamlit, Git, GitHub **Databases:** SQL (relational databases)

CERTIFICATIONS

Business Metrics for Data-Driven Companies · Duke University / Coursera (2026)

Data Manipulation with Pandas · Joining Data with Pandas (DataCamp) | Data Visualization for BI · Pandas & NumPy (Platzi)
